3 Sample interpretation

A harmonious aspect between the Moon and Mars describes a bond where emotional needs meet natural courage. Partners energize each other; passion and tenderness share the same sentence. In crisis, the other is not calming but strengthening — so problems are solved without being inflated.

By contrast, Mercury square the Moon is one of your strongest points: the two of you speak differently. One goes for the conclusion, the other for the feeling. The first years find it charming, the middle years tiring; the answer is to ask for meaning rather than reply, whenever disagreement starts. The full report opens every interaction like this, one by one.

4 Action tips

1. Keep Monday (Moon's day) for an evening together: no criticism, only feelings.

2. Use a 20-minute break rule when an argument starts; the Jupiter sextile forgives, the square hardens.

3. Hold one shared goal (travel, saving, learning): Jupiter-Sun grows stronger as you grow together.
